PROJECTS ⬈

DevGrid- Networking Platform ⬈
Web Technologies: React Js, Node Js, MongoDB

📅 Apr '23

- A platform where developers and tech enthusiasts can connect with each other, collaborate on projects, and share their knowledge and experience.
- The coding profile helps users keep track of their progress in various coding and development practice platforms such as Codeforces, LeetCode, gfg, codechef, and GitHub. It includes a chart visualizer that displays the total number of questions attempted by the user in each platform.

Android Chat Application ⬈
Technologies: Android Studio, Kotlin, Firebase

📅 Sep'22

- Empowered users to effortlessly create accounts, log in securely, and engage in lively real-time text conversations with other users.
- Powered by the robust Firebase backend, seamlessly integrated for secure user authentication and real-time messaging functionality.
- 1h 07m Average engagement time and 19 conversions
- Demographic: 22 users from +7 Countries Engagement Rate 79.46%

BharatDarshan- Heritage Exploration ⬈
Web Technologies: HTML, CSS, JavaScript.

📅 Nov'22

- Designed a paperless ticket booking system for heritage sites, enabling visitors to easily purchase tickets and access them from home through various web devices.
- The website showcases a variety of destinations and allows users to filter and search for options based on their preferences.
- The project required me to research heritage sites, gather information about the typical ticket booking process, identify the pain points, and develop solutions for the same.
- GTmetrix Grade A with WebVitals [LCP- 305ms TBT - 70ms CLS-0]
